

Security, Delivery & Terms and Conditions

Gift voucher orders are delivered by Australia Post Express in two (2) to three (3) business days. Signatures are not required. Unfortunately, China Doll restaurant cannot accept any responsibility for stolen or missing gift vouchers. It is the responsibility of the purchaser to check the correct delivery address is entered.

Gift voucher receipts may be caught in email spam filters, so it is up to the recipient to check these filters. If you require a receipt and have not received this in your inbox or junk folder, please feel free to contact us.

Please advise if your gift voucher does not arrive within four (4) days. China Doll Restaurant attempts to deliver the best possible service to our customers; however, we cannot be responsible for delays with Australia Post.

We advise booking in advance for peak time periods to avoid disappointment, (i.e. four – six weeks in advance for Friday and Saturday evenings). Tables are allocated with relevance to reservation date, weather and party size.

Gift vouchers may only be used at China Doll Restaurant, not our affiliated venues. Guest must present physical voucher to redeem. If a voucher is emailed, the voucher will need to be printed in order to be redeemed. Voucher cannot be redeemed for cash or credit and must be used in one visit.

Validity and expiry of gift cards

Vouchers are valid for three (3) years from the date of purchase. Validity may be extended upon request, at the discretion of China Doll.

We reserve the right to change these terms and conditions at any time. Any changes to the terms and conditions can be viewed at [\(insert link\)](#).

We accept Visa, Mastercard and AMEX. All orders are charged in \$AUD. If ordering from international destinations, you may incur foreign currency charges from your bank.

All transactions are processed through Commweb using the latest 128-bit SSL (secure sockets layer) encryption technology. China Doll does not record your credit card details.

More information regarding security can be found [here](#).
